3 YEAR MANUFACTURER'S WARRANTY

This PetSafe Outdoor Bark House is covered by manufacturer's warranty for 3 years.

WEATHERPROOF – DESIGNED FOR OUTDOOR USE

Leave it outside for continued use. It's designed to be completely weatherproof to survive the Australian weather all year round.

EASY SETUP – WORKS RIGHT OUT OF THE BOX

The PetSafe Outdoor Bark House doesn't need any complicated programming or settings to tweak. Simply slap on some batteries, turn it on and it's ready to go.

SAFE ULTRASONIC DETERRENCE

The irritating ultrasonic sound is inaudible to humans but is very safe for dogs. It activates when the unit detects a bark within the monitored area and stops when the dog stops barking. Note: Dogs will still be able to bark when needed. Their instincts are stronger than the deterrence this device offers so they can bark during emergencies.

DECORATIVE BIRDHOUSE DESIGN

With a decorative birdhouse design, this unit can be hung outside without having to cover it up. It looks good and has proven itself to be effective.

UP TO 15M COVERAGE AREA

The PetSafe Outdoor Bark House has 4 levels of operation. Choose between Test, Low (Up to 4.5m), Medium (Up to 9m) and High for up to 15m of coverage. It will detect barks and emit the ultrasonic sound at the distance you select.

BATTERY OPERATED WITH LED BATTERY STATUS INDICATOR

A replaceable 9v Alkaline Battery powers this Outdoor Bark House for up to 2 months of use. Determine the battery level with the LED Indicator Light and turn the unit on/off to conserve battery.
