ULTRASONIC SOUND DETERRENCE – SAFE FOR ALL DOGS

The new PetSafe Ultrasonic Indoor Bark Control Unit uses high pitched ultrasonic sound to deter your dog from barking. The sound is safe and annoying and can only be heard by dogs.

MICROPHONE BUILT-IN – SOUND ACTIVATED FOR UP TO 8M

The built in microphone beside the speaker picks up your dog's bark up to 8 metres away. It then automatically activates and should slowly train your dog to stop or reduce unnecessary barking inside the house.

NOW COMES IN PAIRS FOR MULTI-ROOM COVERAGE

The new PetSafe Indoor Bark Control now comes in a twin pack so you can cover more than one room simultaneously.

NEW SLEEKER DESIGN FOR EASY MOUNTING

The new smaller and sleeker design is perfect for mounting anywhere. The box comes with 2 adhesive strips so you can stick the units on places where it's less of a nuisance such as the door or on the window.

WEATHER RESISTANT CASING

Since the unit is designed to be used indoors, it is not advisable to immerse the unit in water. It's weather resistant so splashes of water can be dried off instantly but internal damage may occur if water finds its way inside the unit.

POWERED BY CR-2032 BUTTON TYPE BATTERIES

Each unit is powered by 2 CR-2032 button type batteries and may last up to 2 months of use on average.

DUAL COLOURED LED STATUS LIGHT

The dual coloured LED light lets you know of certain functions of the unit. Check the Owner's Manual for more details.
