### Plastic Contact Posts

Reduce the chance of skin irritation with the conductive plastic contact posts on the Dogtra IQ No Bark Collar.

### 10 Programmable Static Stimulation Levels

The Dogtra IQ No Bark Collar features 10 static stimulation levels that you can choose from to suit your dog's personality and temperament.

### Vibration Only Setting

For dogs that are just starting out to use the collar or for dogs that have been fully trained and doesn't require static stimulations anymore, a vibration only option is also included.

### Learning Vibration System

The Learning Vibration System activates a vibration stimulation before each static stimulation so you can gradually stop using static stimulations to train your dog.

### Completely Waterproof & Submersible

Some dogs hate water but for the dogs that love it, the Dogtra IQ No Bark Collar allows you to continue training even if your dog decides to splash around in puddles and play under the rain without causing water damage to the bark collar.

### Uses CR2032 Button Type Batteries

The Dogtra IQ No Bark Collar uses CR2032 Button Type Batteries. They are easily replaceable so you won't lose time while training when your battery runs low.

### Sleep Mode to Save Battery

When not in use, a Sleep Mode is activated to save your battery life. This will save you from getting extra batteries often.

### Designed for Small to Medium Dogs from 4kgs

The Dogtra IQ No Bark Collar is designed to be used on tiny to medium sized dogs from 4kg and up.
