REFILLABLE CITRONELLA SPRAY

The kit comes with 1 free canister of citronella spray refill. Each refill gives you 25 sprays which totals to about 250 sprays per canister. The citronella spray is a measured spray each time it activates and is safe for the dog but annoying.

NEARLY 90% EFFECTIVE – CITRONELLA SPRAY BARK COLLAR

Research shows that the PetSafe Anti-Bark Spray Collar will reduce nuisance barking by almost 90%. With proper and consistent training, the effectiveness can be increased.

WEATHERPROOF DESIGN – FOR EVERYDAY USE

For rough handling and active dogs, the PetSafe Anti-Bark Citronella Collar is built to be weatherproof and water-resistant. The unit is not submersible.

SOUND ACTIVATED – SPRAY ACTIVATION FROM YOUR DOG

Other bark collars activate for no reason and that is bad for training while confusing or scaring your dog at the same time. The built-in microphone ensures that it only activates from the sound of your dog's bark coming from its vocal cords.

6V USER-REPLACEABLE BATTERY – LASTS UP TO 6 WEEKS

Depending on the frequency of use, the 6V battery is user-replaceable so you won't need to take the collar off when you're running low on battery. Simply pop out the old battery and replace it with a new one.

DESIGNED FOR SMALL TO LARGE DOGS

The PetSafe Anti-Bark Citronella Spray Collar is perfect for small to large sized dogs from 5kg. It measures 5.2 x 3.5 x 3.5cm. The unit may be a bit big for small dogs. For a small dog alternative, try the PetSafe Elite Little Dog Spray Bark Collar.
