### DESIGNED FOR USE ON ANY DOG SIZE

The PetSafe Ultrasonic Indoor Bark Control unit is designed to minimize and control nuisance barking of any type of dog.

### USES A SAFE ULTRASONIC SOUND TO DETER BARKING

An ultrasonic sound is used to distract your dog from barking. It's harmless, annoying for your dog and inaudible to humans.

### AUTOMATIC ACTIVATION – SOUND ACTIVATED

The Indoor Bark Control works out of the box. It activates automatically as soon as it detects barking.

### STICK IT TO A DOOR, A WALL OR LEAVE IT ON A COUNTER

The PetSafe Ultrasonic Indoor Bark Control has a new freestanding design. It also includes mounting strips so you can stick it to a door or a wall.

### ULTRASONIC SOUND RANGE OF UP TO 8M

Cover a whole room and render it bark free. The ultrasonic range can reach up to 8m away.

### MONITORS YOUR DOG'S BARK WITH A BUILT-IN MICROPHONE

The PetSafe Indoor Anti Bark Control detects your dog's bark with a microphone. Works with multiple dogs and eliminates the need for a receiver collar.

### USES 3V LITHIUM CR2032 BATTERIES – REPLACEABLE

The package includes 2x 3v Lithium CS2032 batteries to power the unit. They are completely replaceable and lasts up to 2 months.

### 2 COLOUR LED LIGHT STATUS INDICATOR

The LED indicator will let you know when it is emitting an ultrasonic sound and when you need a change of batteries.
