VIBRATION STIMULATION – 10 RANDOM COMBINATIONS

The PetSafe Vibration Bark Collar – VBC-10 uses vibration stimulation to deter a dog from barking excessively. It's a lighter solution compared to static stimulations but can be just as effective with the proper training. It features 10 random combinations of vibrations to ensure its effectiveness every time.

PERFECT BARK TECHNOLOGY – DUAL DETECTION

With Perfect Bark Technology, the PetSafe Vibration Bark Collar requires both vibrations and sound coming from your dog's vocal cords to be detected simultaneously before delivering stimulation.

WATERPROOF & DURABLE

The PetSafe VBC-10 Vibration Bark Control Collar is completely waterproof for water loving dogs. It offers you peace of mind by reducing your dog's nuisance barking as well as protecting itself and your dog from water damage.

ADJUSTABLE COLLAR STRAP FOR SMALL TO MEDIUM DOGS

Best suited for small to medium dogs, the included collar strap is adjustable for a perfect fit for dogs with neck sizes of up to 71cm.

LED BATTERY INDICATOR – ON / OFF SWITCH

An LED indicator will let you know if the PetSafe Vibration Bark Collar is running low on battery. This eliminates the risk of a dog running around your yard and making a racket. An On/Off switch is also built in so you can save battery when the collar is not in use.

USERS PETS SAFE RFA-188 3V LITHIUM BATTERY

The PetSafe Vibration Bark Collar uses the PetSafe RFA-188 3V Lithium Battery. It's a special battery from PetSafe that also helps with waterproofing the unit.

3 YEAR MANUFACTURER'S WARRANTY

The PetSafe Vibration Bark Collar VBC-10 is covered by a manufacturer's warranty for 3 years.
