### DESIGNED FOR STUBBORN MEDIUM TO LARGE SIZED DOGS

The PetSafe Stubborn Dog Receiver Collar is designed to be comfortable when worn on the neck of medium to large sized dogs with a maximum collar size of 71cm. A snug but comfortable fit is important for effective containment.

### 4 HIGH OUTPUT PROGRAMMABLE STATIC STIMULATION LEVELS + AUDIBLE TONE ONLY

With 4 Programmable Static Stimulations that deliver high output static, you are sure that your stubborn dog is safely and effectively contained inside your property. Even at the highest level of stimulation, the PetSafe Stubborn Dog Receiver Collar is completely safe and will not hurt your dog. An audible tone only mode is also included so you can train your dog with the system.

### COMPLETE WATERPROOF HOUSING

The outer casing of the PetSafe Stubborn Dog Receiver Collar is designed and built to be completely waterproof. Worrying about your dog running into the rain and ruining the collar is a thing of the past.

### LOW BATTERY INDICATOR

The Low Battery Indicator Light will flash every 5 seconds when the battery needs replacement. This is an important feature and may save your dog's life. If the collar's battery dies, your dog may be able to escape your property.

### REPLACEABLE 9V ALKALINE BATTERY

Stock up on 9V alkaline batteries and you won't have to drive to the shop every few weeks for a new one. This spells convenience as all you need is to simply replace the battery when it's low and ensure that your dog is contained continuously.
