### 8 HIGH AND 8 LOW STIMULATION LEVELS + TONE ONLY MODE

Flexibility was in mind when the PetSafe Big Dog Trainer was designed. It features 8 high stimulation levels and 8 low stimulation levels which totals to 16 total levels for any dog personality and temperament. It also includes a tone only mode for dogs that have been fully trained and doesn't require stimulations anymore.

### +2 BOOST BUTTON – EXTRA DISTRACTION

The +2 Boost Button is usually used to distract a dog from doing something unwanted. It delivers a stimulation 2 levels higher than your current setting. A quick and instant attention getter.

### WATERPROOF COLLAR AND WATER-RESISTANT TRANSMITTER

The PetSafe Big Dog Training Kit includes a waterproof receiver collar so your dog can be trained in the beach or under the rain without damaging it. The Remote Transmitter is water-resistant so minor splashes will be fine.

### BEST FOR BIG DOGS WITH UP TO 71CM NECK SIZE

With a collar strap that fits necks up to 71cm, the PetSafe Big Dog Training Collar is perfect for our larger sized friends weighing over 18kg.

### LITHIUM BATTERY – USER REPLACEABLE

To avoid losing any time in the middle of a training session, the PetSafe Big Dog Training Collar uses CR2032 button type batteries that are easily replaceable.

### UP TO 100M RANGE – FOR PARKS AND OTHER DOMESTIC AREAS

With a signal range of up to 100m, the Big Dog Training Collar is perfect for training big dogs in a domestic area. Train your dog in the park or on the front yard!

### DIGITAL DISPLAY TRANSMITTER SHOWS CORRECTION AND BATTERY LEVEL

Don't train on a dead or nearly empty battery. The PetSafe Big Dog Remote Transmitter is equipped with a digital display that shows you the level of the stimulation you set it to as well as the battery level.
