CAN STORE UP TO 1.5 LITRES OF FILTERED WATER

The Original Pet Fountain by Drinkwell can comfortably store up to 1.5 litres of water enough to hydrate small to medium dogs for hours while you're away or when stuck in traffic.

DISHWASHER SAFE DISASSEMBLED PARTS

The dog drinking fountain can be disassembled for easy cleaning. All of its parts that need cleaning are perfectly dishwasher safe to make it easy for you.

CUSTOMISABLE WATER FLOW RATE

You can entice your dog to drink more water by increasing the water flow rate. The lever beside the ramp in the bowl can be adjusted to increase or decrease the flow rate of the falling water.

REDUCED NOISE AND WATER SPLASH

The Drinkwell Original Pet Fountain features a ramp inside the water bowl. This ramp acts as a catch that reduces water splashing around the water bowl and also decreases noise made by the splashing water.

BEST SUITED FOR SMALL TO MEDIUM DOGS

The water bowl's size and its capacity of holding up to 1.5 litres of water is best suited for small to medium dogs that are usually left unsupervised at home.

COMPLETELY REPLACEABLE CHARCOAL FILTER

The water inside the water bowl passes through the charcoal filter inside the Pet Fountain. This allows your dog to drink healthy and clean water without tastes or odours that is usually not very inviting for your dog to drink water.

2 YEAR MANUFACTURER'S WARRANTY

The Drinkwell Original Pet Fountain includes a non-transferable manufacturer's warranty for 2 years.
